

For Immediate Release: January 16, 2019

NEW! RC8B3.1 Underdrive Differential Gear Set

This gear set for the RC8B3.1 and RC8B3.1e V3 differentials is great for low traction tracks. The underdrive gear set slows down the rear tire rotation compared to the front, making it more responsive on low grip surfaces.

Features

- Using underdrive gears in the rear end makes the rear tires rotate slower than the front
- Beneficial when running in low traction conditions to smooth out the car's responsiveness
- Includes 42T ring gear and 12T pinion gear
- Compatible with RC8B3.1 V3 differentials on the RC8B3.1 and RC8B3.1e

UPC: 784695 810099	#81009	RC8B3.1 Underdrive Differential Gear Set	MAP: \$42.50	MSRP: \$ 49.99	BUY NOW!
